

Schenck rental service

To bridge unexpected outages

Schenck rental devices

To bridge unplanned machine breakdowns

1) MMD3 Rental device (measuring module)

- ▶ Installation by Schenck technician recommended
- ▶ Intervention in the measurement chain (MMD = Core component for signal processing)
- ▶ Revalidation of the machine using a certified working standard.

Required with every MMD replacement:

- + after installation of the MMD3 service rental device
- + after realization of the modernization to MMD4

2) CAB units

- ▶ Customized configuration in our technical center
- ▶ Installation by Schenck technician recommended
- ▶ Fast replacement without revalidation of the machine possible with a 1:1 rental device and availability of legacy data
- ▶ Revalidation of the machine using a certified working standard.

Relevant when using a technically newer rental device:

- + after installation of the rental device
- + after realization of the modernization

3) Rental scales (ESC and ESD up to 20 kg, ESF up to 200 kg)

- ▶ Commissioning & revalidation of the rental scale and the repaired customer scale by a Schenck technician is mandatory
- ▶ Function test by Schenck after return delivery of the rental scale
- ▶ Repair of the customer scale within approx. 4 to 6 weeks

We support you throughout your entire balancing process
